PROFESSIONAL SUMMARY

Data Engineer and Senior Analyst with 5+ years of experience in **data management, data engineering, and analytics** across global enterprises. Proven expertise in **designing, integrating, and optimizing scalable data pipelines**, implementing **data quality frameworks**, and driving **business impact through analytics solutions**. Skilled in **Python, SQL, Databricks**, and **Azure** ecosystem services with strong experience in **relational and non-relational databases**. Adept at working in **cross-functional teams**, aligning data initiatives with business strategy, and delivering actionable insights.

PROFESSIONAL EXPERIENCE

Accenture, Bangalore, India

Oct 2017 - May 2022

Application Development Senior Analyst | Client : Siemens, USA

- Designed and implemented **data pipelines** for processing large-scale manufacturing datasets using **Spark, Hadoop**, and **Databricks**, enabling real-time analytics and reducing latency by 40%.
- Developed automated data ingestion and transformation flows using **Python and AWS Lambda**, delivering 200+ reports daily, cutting down turnaround time by 30%.
- Partnered with stakeholders to align **data pipeline design and analytics** with business KPIs enhancing decision-making and operational efficiency.
- Boosted operational visibility by creating **interactive dashboards** using **Power BI and Tableau**, improving operational visibility across maintenance and production teams.
- Cultivated an **Agile** centre of excellence within the project, elevating project success rate to 80% across the domain.
- Authored detailed technical documentation to support data models, ETL processes, and production workflows.

Application Development Analyst | Client: Merck, Germany

- Engineered **end-to-end** data integration for Electronic Health Records (EHR) systems, revising clinical decision support systems by **30%**.
- Revamped pharmaceutical operations by engineering **ETL pipelines** to process **5+ million** clinical and operational records, refining data insights by **15%**.
- Strengthened database performance by applying best **SQL** practices to optimize **Redshift** queries, reducing response times by **40%**.
- Ensured **data security and compliance** by integrating AWS CloudWatch monitoring and access controls.
- Improved decision-making through optimized **Power BI** dashboards, visualizing key metrics such as patient outcomes and drug performance, resulting in **20%** improvement in user satisfaction.
- Pioneered **100+ PL/SQL** packages, types, triggers, views and sequences to migrate data across SQL server databases.
- Customized **ServiceNow** incident, change and release management processes for **20+** healthcare releases, minimizing reporting time by **30%**.

Application Development Associate | Client: Pearson, USA

- Enhanced data collection systems using **Azure Data Factory**, integrating **student records and survey data**, decreasing data retrieval times by **30%**.
- Employed advanced statistical analysis and **Azure Machine Learning** for **time-series forecasting** resulting in student performance improvement by **20%**.
- Upgraded and managed **MySQL** and **PostgreSQL** databases, significantly enhancing data accessibility by **15%**.
- Improved learning outcomes by designing **A/B testing** frameworks to evaluate new educational programs, fostering student-centric innovation.

ACADEMIC PROJECTS

Loan Default Prediction with Big Data & ML

Oct 2024

Designed Spark-based model using **PySpark MLlib**, highlighting key risk factors with 0.78 AUC.

Sentiment Analysis of Social Media for Brand Perception

Aug 2024

Implemented advanced **NLP techniques** for social media sentiment analysis, powering a recommendation system to optimize marketing strategies.

Predictive Modeling for Customer Retention

Dec 2023

Devised a predictive model using **Python** and **Scikit-learn**, identifying high-risk churn customers and reducing churn by 20%. Revamped model accuracy through feature engineering and logistic regression and random forest algorithms.

Sales Forecasting Using Time Series Analysis

Oct 2023

Built an end-to-end forecasting pipeline using Python and ARIMA, improving sales forecast accuracy by 30%.

TECHNICAL SKILLS

Programming Languages: Python, R, Pyspark, Java, HTML, CSS, Javascript, AJAX, Flask

Database: Oracle, MySQL, MS SQL Server, PostgreSQL, MongoDB

Business Intelligence: Tableau, Power BI, Excel (VLOOKUP, HLOOKUP, Pivot tables, Macros)

Data Engineering: Apache Spark, Hive, Hadoop, HDFS, Kafka, Databricks

Machine Learning: Statistical Analysis, Predictive Modeling, Ensemble Methods, Computer Vision, Image Processing, NLP, Gradient Boosting Machines, Deep Learning, Graph Neural Networks (GNNs), Large Language Models (LLM)

Cloud Platforms: Azure (Data Factory, Synapse, Blob Storage), AWS (Lambda, S3, Redshift, CloudWatch)

Tools: Jenkins, Jira, Git, VS Code, Oracle Data Integrator, PL/SQL Developer, SQL Developer, ServiceNow

CERTIFICATION

Microsoft Certified: Azure Data Fundamentals

Apr 2025

Microsoft Certified: Azure AI Fundamentals

Apr 2025

EDUCATION

Master of Science in Computer Science, Illinois Institute of Technology, Chicago, USA

Jan 2024 - May 2025

Coursework: Business Analytics, Machine Learning, Data Mining, Data Preparation, Data Visualization, Advanced DBMS

GPA: 4.0

Bachelor of Engineering in Computer Science, Visvesvaraya Technological University, Bangalore, India

Aug 2013 - Jul 2017

Coursework: Web & Application Programming, Statistics and Probability, Data Structures and Algorithms, DBMS

GPA: 3.9
